

Project Progress Report

Objective:

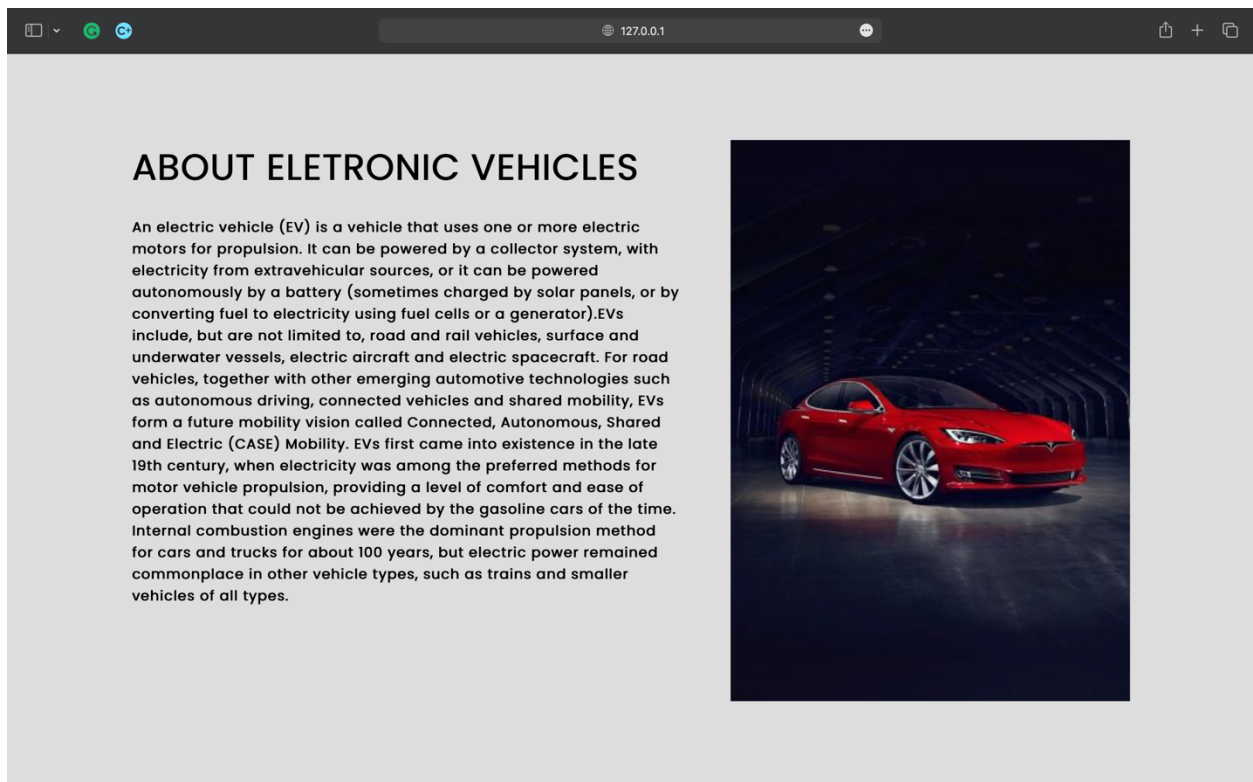

Design an 'About EV' page that tells the user about electric vehicles and give them a basic idea about what they are.

What I did last week:

Designed signup page of the project using HTML and CSS which asks the user to sign up in case of new user.

What I did this week:

I designed the about-EV page of our project which that tells the user about electric vehicles and give them a basic idea about what they are.

What next:

I am planning to create the about non EVs page and get all other pages from my teammates and finally combine them all together and get the personalized report.
